RESIN FLOORS

Hendy Showroom, Royal Tunbridge Wells
2,503 m²

Vebro Polymers, Vebrodeck ID 2mm

A total of 2,503 m² of grip coat system was installed across the car workshop and ancillary rooms to deliver a durable, slip-resistant surface. This included the application of a scratch coat to reduce the appearance of underlying imperfections and ensure a high-quality final finish with clean joints. The project site was a repurposed department store, presenting a variety of existing surface types that required removal prior to resin application. Some areas also needed repair and preparation to achieve a consistent substrate. Despite the complexities, the project was delivered on schedule. The client was highly satisfied with both the performance and aesthetics of the finished flooring system.
